**Clicars optimizes
its financial area
with SAGE X3**

Sage Business Partner
Gold

About Clicars

Clicars is the leading Spanish **seller of used cars on the Internet, with delivery to the customer's home.**

They are currently **number 1 in Europe** in online car sales, with a team of **more than 500 employees** and a turnover of **250M€** in 2021.

The challenge

When Clicars contacted GOLIVE, it was clear that they need **a SAGE partner to help them implement the SAGE X3 ERP.**

Until that point, Clicars had been using SAGE 50 for all its accounting and finance processes and EF as an operations solution. However, they were outgrowing this ecosystem and needed to take a further step in their digital transformation.

They chose GOLIVE as a trusted SAGE specialist partner to carry out the implementation of SAGE X3 and integrate it with EF.

The solution

A **successful SAGE X3 implementation**, maximizing the use of its accounting and finance functionality, on time and on budget.

In addition, with SAGE X3 integrated with its operations management system, EF, important additional benefits have been realized:

- Elimination of paper- and Excel-based processes.
- Ease in consulting and extracting information for Central, since the mapping of accounts to the central chart of accounts has eliminated any manual effort.

GOLIVE AS SAGE X3 PARTNER

As a SAGE partner, GOLIVE has been able to offer (both at technological and business levels) everything necessary to make the implementation of the ERP a success.

Not surprisingly, our **professional team** has extensive **experience** that helps us **understand client needs**, delving into the specific processes of each company and facilitating successful implementations.

Benefits obtained

SECURITY

SAGE X3 guarantees both data security and access security.

ACCURATE INFORMATION

By working with a single system that allows the entry of data only once, there is no duplicated information and reduced manual errors.

CENTRALISATION

All processes in the financial area are managed with a standard, robust and scalable system.

PROFITABILITY

Being able to have information available quickly and ensuring optimal decision making proactively and in real time.

ABOUT GOLIVE

GOLIVE
