**Grupo San Juan
digitizes waste
management with
Sage X3**

[GOLIVE]

Company history

Grupo San Juan is a Spanish company founded in the mid 1970s that is dedicated to the **management and segregation of waste**, both metallic and other recoverable wastes.

With a surface area of 40,000 square meters and a current capacity of 30,000 tons per year, the plant has the capacity to continue growing and to do so with new lines of work.

It is a **national leader** in the dismantling and demolition of all types of facilities, as well as in integral management of hazardous and non-hazardous waste.

Grupo San Juan is undertaking **a process of consolidation and professionalization of its organizational and operational structure**. As part of this process, the group has deemed it essential to digitalize the company and implement a management software package that capable of helping with all this change.

The company had been working in a very traditional way, **with hardly any digitalized processes and very few defined procedures**.

01

CONSIDER THE NEEDS

One of the first steps required to digitalize the business was **implementing a management software solution**.

This **system needed to help Grupo San Juan standardize processes across the company** and allow the migration off the Excel worksheets used independently by each department. Non-value-add manual tasks also needed to be eliminated.

02

THE SOLUTION

The company opted for the ERP software suite **Sage X3** to digitalize its operations.

Sage X3 stood out as being the most complete solution at a functional level, as well as being very intuitive and adaptable to the group's specific business model of demolition and waste management.

03

THE PROJECT

- Complete management of recoverable and non-recoverable waste.
- Multiservice standard order.
- Waste collection automation.
- Container management through QR codes.
- Service orders to the carrier via mobile app.
- Digitalization of DI document management.
- Complete item management through LER codes.
- Interfaces with scales, POS, dispensers, etc.

04

IMPLEMENTED AREAS IN SAGE X3

- Financials
- Inventory
- Sales
- Purchasing
- Marketing
- Production
- Project Management
- Transportation Management
- Maintenance

”

“When we determined that the solution for us was SAGE X3, we considered different partners to implement it. We liked GOLIVE for several reasons. During the pre-sale, they showed us a greater knowledge, both of the product and of their capabilities as consultants, when it came to contributing methodology to the solution that others didn't. In addition, we really liked their proximity, not only physically but also in the personal treatment they provided. We appreciate that their commitment has been, and continues to be, total to our approach and our expectations.”
